Summary

A disciplined and detail-oriented computer scientist with a strong background in full-stack development, mainly using the MERN stack. Proficient in front-end and back-end development focused on creating intuitive and efficient user-friendly experiences. Skilled in agile development methodologies and comfortable working in a team environment.

Technical Skills

Languages: HTML, CSS, JavaScript, Java

Frameworks & Libraries: MERN stack (MongoDB, Express.js, React, and Node.js), Bootstrap, Tailwinds

Application/Tools: Git, VS Code, Jest

Projects

Who's App

Collaborative Developer

- A full-stack application that uses the Socket.IO library to enable real-time communication between the front end and the back end.
- The front end of the chat application is built using JavaScript and is designed to be responsive and provide a seamless user experience on both desktop and mobile devices.
- The backend is built using the ExpressJS framework and is responsible for managing the routing and API endpoints for the application. It connects to a MySQL database to store and retrieve user data.

Wine&Dine

Collaborative Developer

- A full-stack web application using the MERN stack that allows users to search and save their favorite recipes
- Utilized the Spoonacular API to retrieve recipes and implemented MySQL for persisting food data
- Utilized agile development methodologies, including Scrum and Kanban, to quickly deliver high-quality features.

Home Choice

Collaborative Developer

- A full-stack application for home buyers that uses React frameworks for browsing client-tailored results and calculating mortgages.
- The home-buying application uses the US-Real-Estate API to access real-time data on available properties and their prices. This allows users to see the most up-to-date information as they search for their dream home.
- Connecting US-Real-Estate API to pull real-time for-sale data in the United States.

Education

Georgia Tech Institute Of Technology, 2022

Full Stack Web Development Bootcamp Certificate | Atlanta, GA

The University of West Georgia, 2016 - 2019

Completed 75 credits toward a BA in Computer Science | Carrollton, GA
